

Tirros Networks

Electromagnetic Interference (EMI) and Radiation Disclosure

General Notice

- Cellular small cell equipment emits radio frequency (RF) radiation within FCC-regulated limits.
- If you are located within the FCC maximum allowable RF exposure distance, you may be exposed to EMI radiation.
- By being within this distance, you acknowledge and accept the potential exposure risk in accordance with FCC guidelines.

Safety Warning

- Prolonged close exposure to cellular broadcasting equipment can be extremely hazardous.
- Do not place your face or any sensitive body part in front of the broadcasting equipment, regardless of whether it is powered on or not.
- Prolonged exposure directly in front of the equipment may rapidly heat the skin and tissue, potentially causing severe burns.
- Direct eye exposure within 3 meters of broadcasting equipment can result in catastrophic eye damage.

Compliance

- All Tirros Networks equipment is installed to comply with FCC safety and radiation limits.
- Hosts, users, and bystanders are responsible for maintaining safe distances and following these safety guidelines.
